

CONSTRUCTION INSPECTOR TRAINING PROGRAM

In partnership with the State of Florida, Construction and Engineering Services Consultants, Inc. (C&ES) has implemented a Construction Inspector Training Program emphasizing diversity in the City of Jacksonville and its contracted workforce. Its purpose is to define the initial training and qualification requirements for construction inspector trainees so they can fulfill basic construction duties and advance in other areas of the AEC Industry (Architecture, Engineering, and Construction).

The Construction Inspector Training Program develops inspectors through classroom training, mentoring, and on-the-job experience. Those completing this program will have verified, highly desirable, and proficient skills as Construction Inspectors and will be ready to transition into vital roles in the AEC Industry.
